

# Guidewire DataHub and InfoCenter Implementation

Colin Ball : 3-3 minutes : 3/27/2024

## Offer Vision / Definition

Guidewire DataHub and InfoCenter implementation ensures that insurers have the ability to capture transactional data and provide reporting capability to business. Capgemini provides an end-to-end implementation service: Project and Scope Management, Solution options, aligning with the Guidewire Best Practices, comprehensive solution testing, and deployment support.

## Business Pain Point

P&C Insurers that have made a choice of Guidewire DataHub & InfoCenter need a partner to provide successful implementation which provides ability to capture, manage, maintain and deliver operational and strategic decisions for the business functions of the insurer.

## Offer Details

Our solution is aligned to the business and IT outcomes of the insurer. It provides the following:

- Implementation Methodology
- Point of View on critical choices
- Assets and accelerators across the implementation lifecycle
- Extension Data Model for DataHub
- ETL Scripts for extended Data Model
- Data Model to support Quotes from PolicyCenter
- Report Specifications across Policy, Claims and Billing

## Target Audience & Markets
