IT Emission Management and Control offer is based on the technical expertise of CIS collaborators around ServiceNow, with Invent's definition of a decarbonization strategy for standard IT infrastructures and the action plans to be implemented and monitored over time.

What does it emission management and control offer do?

- Provides IT carbon footprint data intelligence
- Supports customer in creating decarbonization strategy and action plans
- Supports customer in setting up governance for their decarbonization journey
- Provides tools to inform employees about their IT carbon footprint

Our offer is for companies wishing to reduce carbon footprint of their IT assets based on accurate and aggregated data. Capgemini partners with ServiceNow and Aguaro to offer a technology solution to successfully execute sustainability strategy and employee engagement advisory.
