

# HOW TO USE THIS DECK

(PLEASE READ & DELETE SLIDE)

This presentation is meant to serve as an introduction to the **Group Priority Cybersecurity Services**, showcasing how we deliver on our brand promise **Get The Future You Want** for our clients, staff and our communities. The presentation is designed to start this wider conversation and to encourage our clients to re-examine way they view cybersecurity. We seek to shift the focus away from the **prevention of harm and onto how it can enable innovation** and change that lifts the whole organization. It can be used externally with clients and prospective clients, as well as internally in sessions with colleagues.

Although the core slides can be used 'as is' to offer a cohesive cybersecurity narrative, the entire presentation is meant to be a foundation for you to adapt and customize as needed.

Whatever changes you make, the spirit of our Cybersecurity promise **Secure Foundations Create Open Futures** must always come through.

## CORE CONTENTS

- Security in changing world
- Elevator Pitch - Secure Foundation
- Scale and Capability
- Industry Expertise
- Portfolio Focus
- Success Stories
- Differentiators
- Analyst Accolades

## APPENDIX

- Cyber Defense Centers

## SUPPORTING COLLATERAL:

# THE CHALLENGES FOR PROTECTING INFORMATION

**1**

## Data Protection

Protecting the company's Crown Jewels – the data.

**2**

## Growing complexity

Maintaining control and responsibility across multiple locations, hybrid clouds, on-prem & off-prem is increasingly difficult.

**3**

## Regulatory & compliance

Maintaining compliance and protecting different types of data across multiple jurisdictions is tough.

**4**

## Hybrid workplace

Managing identity and access in a workplace with more people working from more locations. All whilst ensuring a good employee experience.

**5**

## Maintaining visibility

With cyber threats facing all levels and all parts of an organization, maintaining a clear view of threats and risks is a growing challenge.

**6**

## Recruit and retain

Keeping and developing the best cybersecurity talent is becoming a growing challenge for organizations.

Hybrid in-office & remote working are driving a **50% increase** in worldwide internet traffic, leading to new cybercrime opportunities.

**Average cost of a data breach is \$4.35 million**  
The cost and impact of data breaches has grown 12% from 2020 to 2022

**Cost of a compliance breach can be extremely costly.**

**52% of leaders struggle to retain cybersecurity talent.**

# CYBERSECURITY INVESTMENTS, DELIVERING RETURNS

**Investments in cybersecurity are reducing costs and improving customer experiences.**

**29** days faster

Organizations with XDR (extended detection and response) technologies identified and contained a breach 29 days faster than those without XDR.

**\$3.0** million USD

average savings from fully deployed security AI and automation versus no security AI and automation.

**31%**

of consumers feel their overall experience with companies has improved since GDPR was enacted.  
Marketing Week

# CYBERSECURITY, THE INNOVATION ACCELERATOR

**Today's leading organizations are more open, able to collaborate, rapid to innovate, and quicker to bring new products and services to market.**

**Example 1**  
**A Global Manufacturer**  
By consolidating the business & security policies of 7 different businesses we were able to reduce application development costs by between **15-20%**.

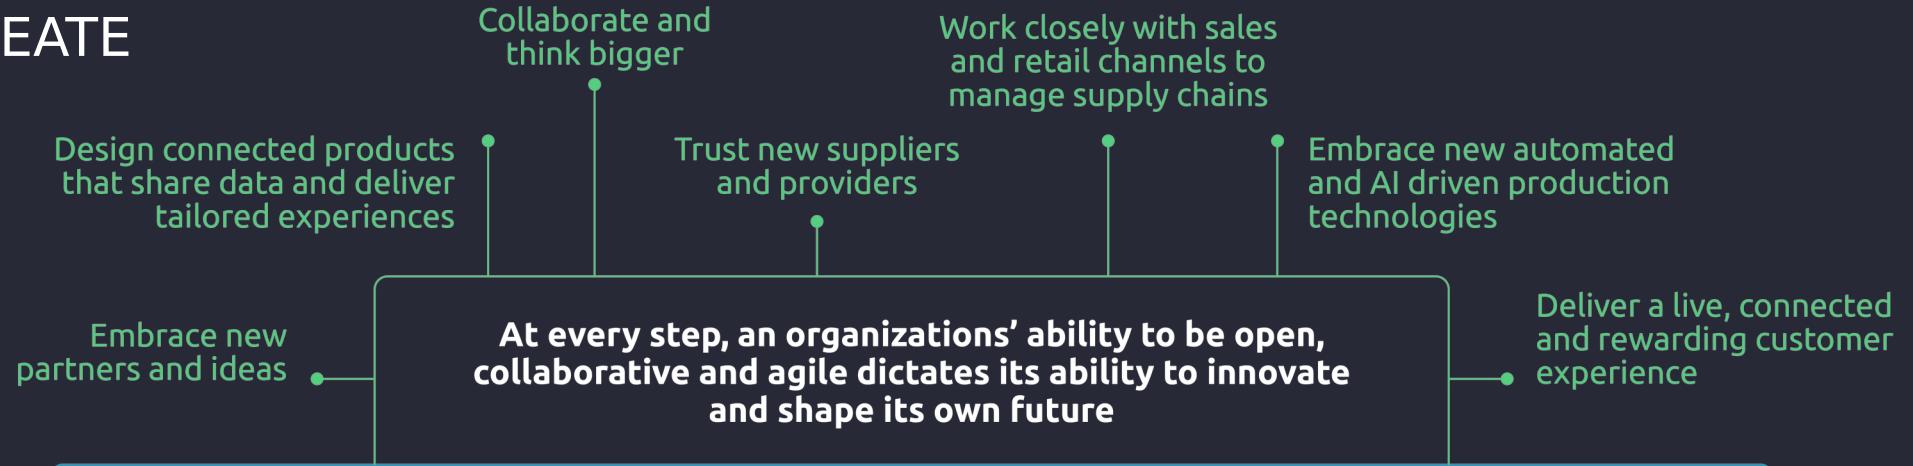

**Example 2**  
**Avionics Supplier**  
By enabling them to meet the strictest Android security requirements, we allowed this customer to accelerate the development of proof-of-concepts for new inflight infotainment systems. The result? New customers and new orders.

# SECURE FOUNDATIONS CREATE **OPEN** FUTURES

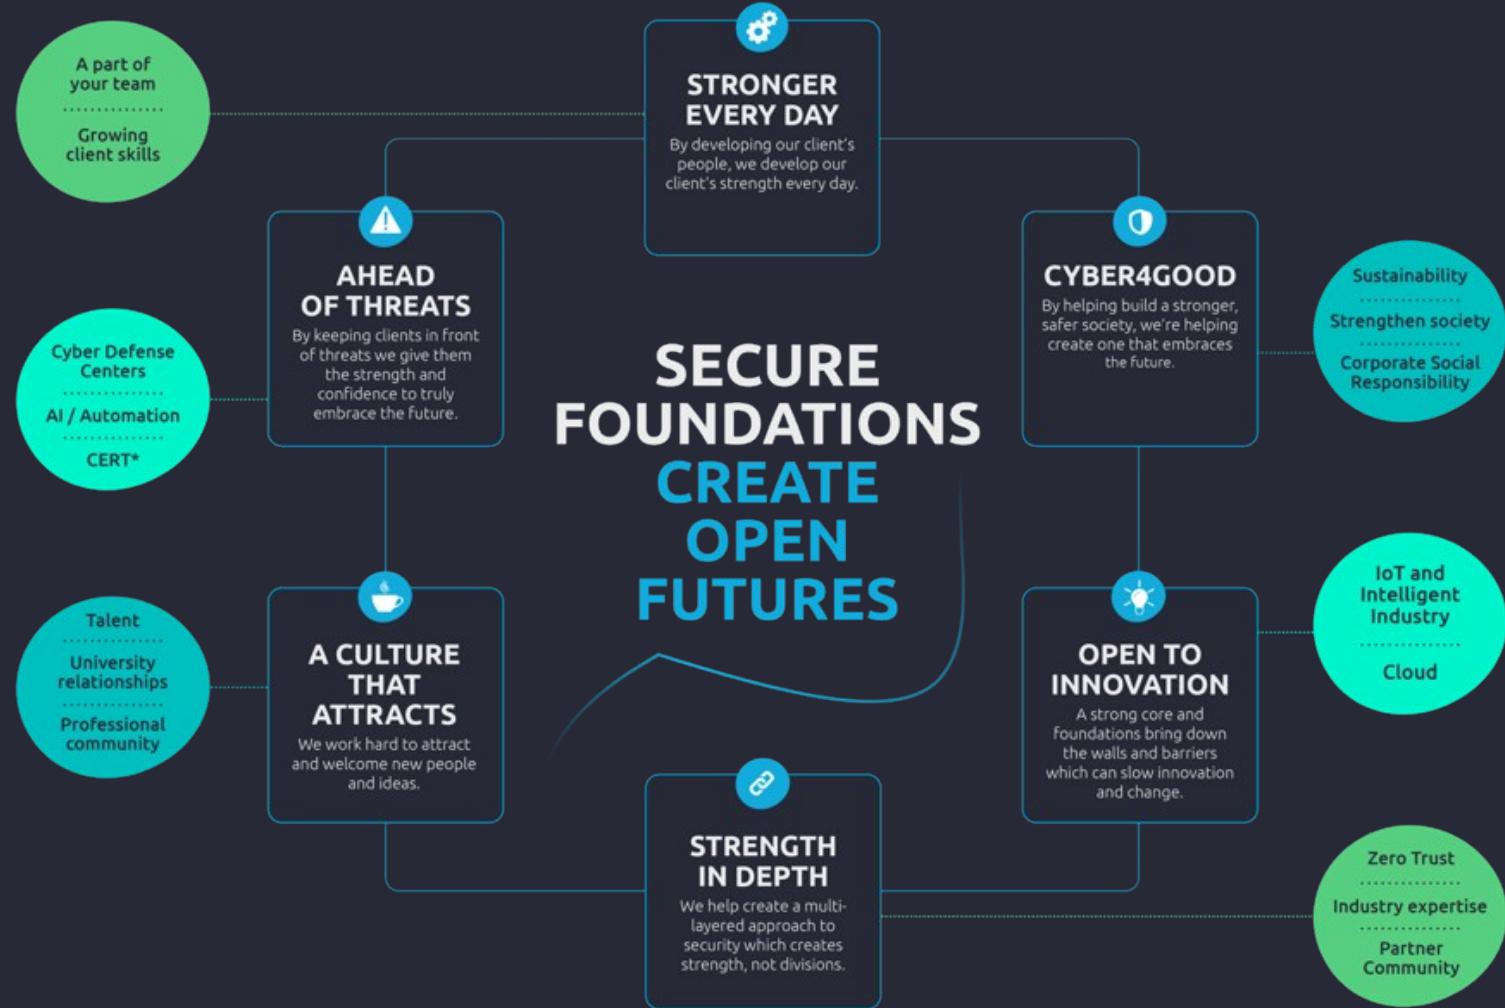

## STRONG CYBERSECURITY FOUNDATIONS

# THE SCALE AND CAPABILITIES TO MAKE A DIFFERENCE

*"By 2025, 60% of organizations will use cybersecurity risk as a significant determinant in conducting third-party transactions and business engagements."*  
- Gartner

Secure Foundations create Open Futures | Capgemini in Cybersecurity

SECURE  
FOUNDATIONS  
ARE OPENING  
NEW  
FUTURES ACROSS  
DIFFERENT  
INDUSTRIES

# Secure foundations are opening new futures in the **Automotive** industry

Software is revolutionizing the auto industry. Organizations must have the confidence in their cybersecurity capabilities to expand their core capabilities from traditional engineering and mechanics to include flexible and agile software development.

## **SECURE FOUNDATIONS ENABLE:**

**Development of connected services** to customers to create an 'extended vehicle experience'.

**Embracing of digital twins**, to simulate the vehicle and streamline design, production, manufacturing and maintenance.

**Onboard/offboard** connectivity systems.

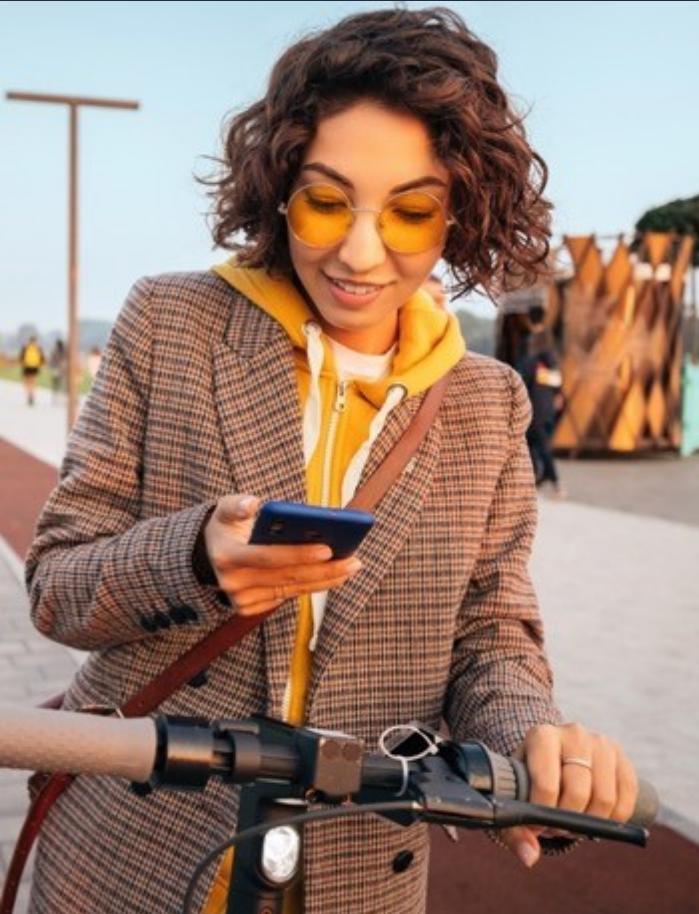

**Ecosystem integration** (e.g., weather forecasts, accident reporting).

**Embracing an end-end** approach to sustainability from manufacturing to electrification and recycling.  
**New business models** (e.g. mobility-as-a-service).

# Secure foundations are opening new futures in the **Consumer Products** industry

The surge to digital during the pandemic has accelerated the shift to a customer-centric world. Only with strong cybersecurity foundations have organisations been able to transform so quickly.

We work with 27 of the world's largest retailers

## **SECURE FOUNDATIONS ENABLE:**

**The era of Connected Commerce** to deliver new experiences for consumers.

**Everywhere Commerce, so that** organizations can trade anywhere, on any platform.

**New opportunities and business models** to be rapidly embraced and delivered.

# Secure foundations are opening new futures for the **Energy and Utilities** industry

Energy transition is demanding huge technology changes across this national critical infrastructure. This scale of change however is only possible with strong cybersecurity foundations.

We support 23 of the top 25 E&U companies worldwide

## **SECURE FOUNDATIONS ENABLE:**

**Intelligent and connected** products that can deliver real energy savings.

**Intelligent operations** that leverage data and connectivity to make smarter decisions - but can also expose new attack surfaces.

**Disruptive new digital technologies** that can target emissions hotspots, reduce carbon and reach a net-zero trajectory—while also stimulating new markets & creating jobs.

# Secure foundations are opening new futures for **Life Science** organizations

The challenge life science organizations are facing, is not to just accelerate time to care – but to do so exponentially and at scale. This bold vision demands cybersecurity capabilities which allow for the reinvention of the entire value chain.

## **SECURE FOUNDATIONS ENABLE:**

**Decentralized trials** that help drive participation beyond the organization.

**New data and digital tools for R&D** that can speed the development process but demand new cybersecurity capabilities.

**Greater use of AI** across the value chain in order to create new efficiencies and accelerate time to market.

**Connected health products and services** that deliver better experience and outcomes for patients.

# Secure foundations are opening new futures for **Telco** organizations

Whilst 5G is certainly the future of the Telco industry, it will require new levels of privacy and compliance. Something that's only possible with strong cybersecurity foundations.

## **SECURE FOUNDATIONS ENABLE:**

**New partnerships** to be quickly embraced and new value created.

**Network transformation** that can deliver new operating and service models.

**Cloud, network function virtualization (NFV) and software-defined networks (SDN)** to be rapidly embraced, providing the foundation for next generation networks like 5G.

**5G and Intelligent industry** opportunities and partnerships to be developed and monetized.

# Secure foundations are opening new futures for the **Public** sector

Governments are investing in transformational programs to deliver more sustainable, more digital, and more resilient societies. This change requires a new type of openness, and a new approach to cybersecurity.

## **SECURE FOUNDATIONS ENABLE:**

**Harnessing of data** to create improved citizen experiences, better outcomes, and increased trust in government.

**Embracing of digital innovation** to deliver more ambitious societal outcomes and respond to grand challenges in an era of mission-oriented innovation.

**Governments** to leverage the power of the hyperscalers while maintaining control and sovereignty.

# Secure foundations are opening new futures for **Aerospace** organizations

As the furious pace of technological change continues, and new developing economies spread their wings, the aerospace sector must be confident in its ability to embrace new technologies and innovate. Something that's only possible with strong cybersecurity foundations.

We work with **9 of the top 10 aerospace & defense companies**

## **SECURE FOUNDATIONS ENABLE:**

**Developing and deploying** new generations of aircraft with advanced avionics.

**Advanced technologies** for the design of new aircraft and systems such as AR & VR, IoT & analytics.

**The delivery of advanced** predictive maintenance through connected IoT devices and sensors.

**Adoption of Industry 4.0** to accelerate production and operational efficiencies.

# Secure foundations are opening new futures for the **Financial Services** industry

With growing pressure from new market entrants, today's finance organizations must be able to innovate and deploy new products and services faster than ever. Something that's only possible with strong cybersecurity foundations.

We work with 8 of the top 15 banks

## **SECURE FOUNDATIONS ENABLE:**

**Banks and insurers** to open their ecosystems & data to third-party vendors by using modern platforms, Fintechs and APIs.

**Leveraging of automation**, ML, AI, Data to make the enterprise more intelligent, efficient and effective.

**Service resiliency** in the face of disaster, bad weather, fire and health epidemics.

**New products and innovations** to be brought to market more quickly.

# A PORTFOLIO TO BUILD END-TO-END STRENGTH

# OVERCOMING CHALLENGES

# THE CHALLENGES FOR PROTECTING INFORMATION

**1**

## **Data protection**

Protecting the company's Crown Jewels – the data.

**2**

## **Growing complexity**

Maintaining governance and responsibility across multiple locations, hybrid clouds, on-prem & off-prem is increasingly difficult.

**3**

## **Regulatory & compliance**

Maintaining compliance and protecting different types of data across multiple jurisdictions is tough.

**4**

## **Hybrid workplace**

Managing identity and access in a workplace with more people working from more locations. All whilst ensuring a good employee experience.

**5**

## **Maintaining visibility**

With cyber threats facing all levels and all parts of an organization, maintaining a clear view of threats and risks is a growing challenge.

**6**

## **Recruit and retain**

Keeping and developing the best cybersecurity talent is becoming a growing challenge for organizations.

# PROTECTING THE CROWN JEWELS

## TODAY'S CHALLENGES

Today data is often an organizations most valuable asset. Data Protection is now one of most important tasks

## CAPGEMINI'S ANSWER

### Intelligent Cyber Operations Data & AI Solutions

- Decisions about security are continuously driven by data
- AI driven cyber defense centers deal with incidents faster and more effectively
- IAM and PAM loop closing monitor privilege escalations

## 2. Growing complexity

# COMPLEXITY IN PROTECTING DATA STORED IN MULTIPLE PLACES

## TODAY'S CHALLENGES

As organizations further embrace cloud in all its forms, they also need to address new risks, new complexities and new shared responsibilities.

## CAPGEMINI'S ANSWER

From Pipeline to Cloud environment, through Everything-as-Code (xaC) modelling, Capgemini's team can provide an end-to-end expertise tailored for each customer based on their maturity model:

- Advice and governance
- Assessment and Risk Analysis
- Secured Architecture, Defense & Hardening
- Security Monitoring and Observability

### 3. Regulatory & Compliance

# COMPLEXITY IN ENSURING ONGOING COMPLIANCE

## TODAY'S CHALLENGES

Ensuring ongoing compliance in the face of continuous change and new regulations can become very costly for organizations.

## CAPGEMINI'S ANSWER

**Compliance as a Service, delivered by our team of experienced compliance specialists, makes compliance simple again.**

- On-shore audit capabilities and service delivery
- Off-shore compliance analysts
- Advanced tools
- Deep expertise Assessment and remediation support
- Regular reporting

### Standards & Compliance Framework

ISO/IEC 27001, SSAE 18/IAE 3402 – SOC 1 and SOC 2, NIST, COBIT etc

### Regulatory Compliance Standards

SOX, PCI DSS, HIPAA, GDPR, China Cybersecurity Law, etc.

### Products Supported

ServiceNow eGRC, RSA Archer etc.

# THE NEW HYBRID WORKPLACE

## TODAY'S CHALLENGES

Enabling smooth ways of working for internal users in the face of new working practices.

## CAPGEMINI'S ANSWER

Capgemini is committed to help its customers manage their IAM on every level

# MAINTAINING THE RIGHT VISIBILITY

## TODAY'S CHALLENGES

Maintaining the right visibility over heterogenous environments

## CAPGEMINI'S ANSWER

**Managed Cyber defense center (CDC) - Monitor your risks from everywhere on everything and respond to security incidents.**

- Incident anticipation
- Incident detection
- Incident response

**Managed-EDR (Endpoint Detection Response) - Address the threat landscape to protect the enterprise.**

- Incident anticipation
- Incident detection
- Incident response
- Incident remediation

# TALENT

## TODAY'S CHALLENGES

Recruiting and retaining the best cybersecurity talent is becoming a growing challenge for organizations.

*It's estimated that there is now a cybersecurity workforce gap of more than 2.72 million positions.*  
Source: (ISC)<sup>2</sup> Cybersecurity Workforce Study, 2021

## CAPGEMINI'S ANSWER

### Access world leading experts and talent.

A deep connection exists between quality of protection and the cybersecurity skills available. Acquiring and retaining very specialized people can be very expensive and difficult.

**As a strategic partner it's our goal to help clients build and develop their own talent, as well as support with our own expertise.**  
At Capgemini we help clients create a culture that attracts and retains the top talent available.

# INDUSTRY SUCCESS STORIES

Delivering zero down time along with zero impacts on critical health, safety and environmental controls required this oil and gas business to enhance its cyber security posture across it's global footprint.

## How Capgemini helped:

- Implemented the transformation of people, process and technology for cyber security operations.
- Stand up 24x7x365 Global Cyber defense center(CDC) with Intelligence-driven operations.
- Lead security operation, trained CDC employees, and advanced cyber maturity.

## THE RESULT

- Ranked #1 in Industry for Security Operation by the top 12 Leading Energy Industry CISOs.
- 8+ years of comprehensive network defense embedded operations on location, including Insider Risk, Threat Monitoring, Threat Intelligence, and Incident Response.
- 100% Defense for nearly 1 decade - 24x7x365 full spectrum protection.

With the right components but a lack of integration, this supercenter chain needed to become more joined up.

## How Capgemini helped:

By benchmarking against industry standards.

By creating a roadmap for the development of 10 specific domains to enhance the client's cybersecurity posture:

- Risk Management
- Asset Change & Configuration Management
- Identity & Access Management
- Threat & Vulnerability Management
- Situational Awareness
- Information Sharing & Communications
- Event & Incident Response
- Supply Chain & External Dependencies Management
- Workforce Management
- Cybersecurity Management

## THE RESULT

- Joined up cybersecurity plan embraced by all key stakeholders.
- Clear division of tasks between ourselves and the client team, ensuring we added value wherever we could.
- Building of the clients inhouse skills and capabilities.

With the introduction of connected vehicles and connected services, security became the highest priority for this global automotive business. The ecosystem and the vehicles had to be resilient against cybersecurity attacks.

## How Capgemini helped:

- Perform Threat and Risk Assessments, including identification of Threat Scenarios and Impact Analysis in terms of Cybersecurity for the connected vehicle.
- Establish Security as a part of Vehicle Development and Reviewed Security Solutions .
- Establish a Commercial Grade PKI, incorporated in Manufacturing and Aftermarket.

## THE RESULT

A platform and foundations to develop tomorrow's connected vehicles and services.

A global view of the security of their connected vehicles.

Faced with new and emerging threats as well as a broadening attack surface this aerospace organization required a new security posture and long-term strategy.

### **How Capgemini helped:**

To develop a new long term strategic security partnership that delivered a 24x7 security operations capability across the IT ECOsystem including:

- Client site dedicated 24x7 Cyber defense centre, GRC, Security Engineering and Digital Forensics.
- Golden Hour processes to resolve serious cyber incidents quickly and minimize business impact.
- Threat Intelligence to move from reactive to proactive cyber operations.
- Advanced Cyber Capability, investigate and defend major cyber incidents and nation state attackers.

### **THE RESULT**

The new security posture was aligned to business requirements, ensuring maximum returns on security technology investments.

Our client had no view of the threats facing their organization. As a business, their reputation and data is of central importance to them

### How Capgemini helped:

- We provided a 24x7 multi-tenant CDC delivered from the highlands of Scotland.
- Replaced Solarwinds and implemented IBM QRadar.
- Provided access to a managed security portal.
- Retained client vulnerability management tool - Tenable. V5.1 and provided vulnerability management (core hours).
- Around 350 devices monitored.
- Integration with existing ticketing system HP Support Works.

### THE RESULT

- Client had a clear view of the threats facing their organization
- Client was able to detect vulnerabilities and take corrective actions
- Client now had devices secure 24x7
- Client was able to show at board level the security of the organization

Evolving technology and customer behaviours, unsteady growth, globalization, and regulatory pressures are forcing banks and insurers to rethink their models.

### How Capgemini helped:

- Transform customer services.
- Automate data migrations.
- Support price and risk management.

### THE RESULT

#### Transforming their customer service experience

We support them to leverage digital and data capabilities via Agile support and hosting services. Results to date include:

- Lower cloud running costs.
- Increased service desk flexibility and responsiveness.

The client's identity and access management (IAM) service portfolio has grown over many years to support enterprise, manufacturing, and partners. However, the IAM technology stack was designed for on-prem infrastructure: potentially a bottleneck for their new "Cloud 1st" strategy.

## How Capgemini helped:

**We used the IAM FastTrack approach to help determine the most optimal go forward IAM strategy.**

Our approach:

- Engaged key business stakeholders help envision a future state aligned to business goals.
- Designed and developed IAM use cases.
- Used a MITRE-ATT&CK based framework to identify potential IAM attack vectors and their mitigation.
- Developed detailed roadmap for migrating their on-prem IAM stack to a hosted model.
- Gained management buy-in to consider a Customer IAM system to increase end-customer engagement.

## THE RESULT

Reduced security risk associated with IAM security vulnerabilities, orphan accounts, sub-optimal monitoring.

Enabled easier/secure collaboration with external partners and end customers while improving operational efficiencies.

Challenged by tough competition from various competitors. This provider of inflight entertainment systems needed to prove their capability to deliver security within their android devices. They needed to build multiple proofs of concept within a short period of time.

## How Capgemini helped:

- We performed a thorough threat analysis and risk assessment.
- Developed security features to verify the integrity of the firmware.
- Leveraged Trust zone for implementing hardware security features like secure UI, Key master, DRM, and others.
- Implemented communication-related security features like Wi-Fi security, Bluetooth security, LTE security, and RF (FM, GPS) security.

## THE RESULT

We helped accelerate innovation whilst also building a trusted product for the airline sector.

They were able to successfully demonstrate their capability in handling android security.

Their customer was impressed by their proofs of concept and selected them ahead of competitors.

Under pressure from globalization, falling budgets and increased citizen expectations, governments must simultaneously rethink service-delivery and navigate new privacy, digital ethics and compliance challenges.

### How Capgemini helped:

- Digital transformation;
- Technology delivery, and;
- Citizen-led innovation,

...with solution showcases at our Applied Innovation Exchanges (AIEs) worldwide.

### THE RESULT

We helped The State of Texas to digitize and automate its shared technology services for the agencies it supports. Results to date include:

- **95%** overall customer satisfaction.
- **82%** server consolidation.
- **98%** change-management success.

# WHY CAPGEMINI

# OUR DIFFERENTIATORS

## Industry Expertise and Proven Track Record

- **Public sector:** We deliver outcomes through digital transformation and citizen-led innovation
- **Automotive:** We serve the world's largest automotive brands
- **Aerospace:** We work with 9 of the top 10 aerospace & defense companies
- **Financial Services:** We work with 8 of the top 15 banks
- **Consumer Goods & Retail:** We work with 27 of the world's largest retailers.
- **Energy & utilities:** We support 23 of the top 25 E&U companies worldwide.

### Innovation

Capgemini's Cybersecurity Experience Center provides immersive and dynamic simulations in SOCs, Industrial control rooms and the Executive board room.

### Global Coverage

**True Global presence:**  
**50+** Countries.  
Network of **15** connected Cyber Defense Centers & Labs.

## Proven Processes & Methodologies

### Strong foundations create open futures.

We're able to help organizations create real strength from end to end, helping them open up and grasp the opportunities that the future brings.

This has helped us achieve a customer retention rate of **95%** and a client satisfaction rate of 4.5/5

### People Centric

Strong **ONE Global Team of 6000+ Skilled Cybersecurity Experts.**  
Our **Cyber Angels** community brings connections and resources to support women in cybersecurity

### Sustainability

We see Cybersecurity as key to delivering the innovations that will help transform our society's sustainability.

# A GLOBAL APPROACH TO PARTNERING

**Capgemini sits at the center of an international network of regional cybersecurity associations and forums.**

We partner with over 50 leading cybersecurity vendors from around the world:

## **A sample of our activity:**

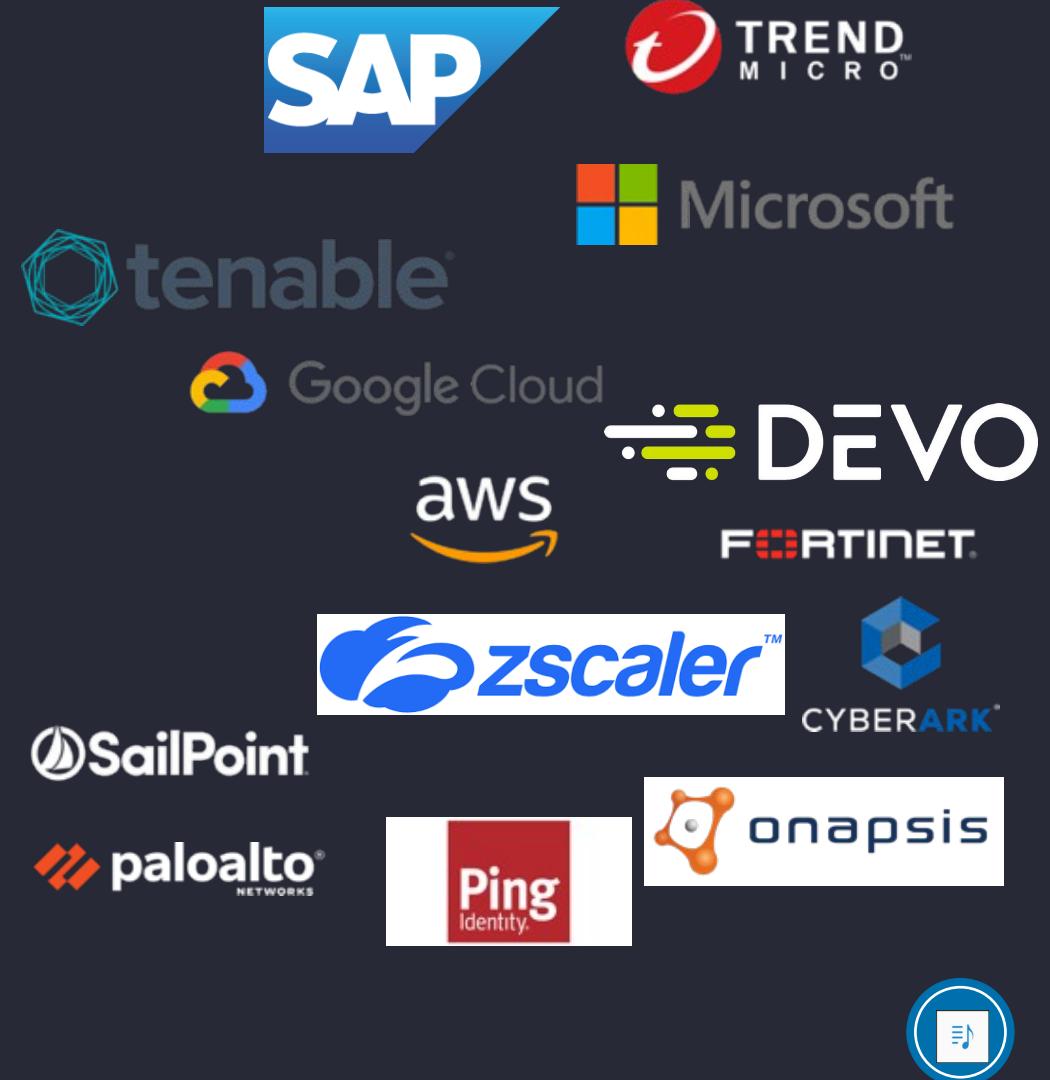

**France:** Member of the Cyber Campus consortium.

**Spain:** Member of the Industrial Cybersecurity Center.

**Italy:** Sponsors of the Cyberchallenge.it initiative.

**Australia:** Member of the Australian Cybersecurity.

**India:** Engaged with the Data Security Council of India.

## About Capgemini

Capgemini is a global leader in partnering with companies to transform and manage their business by harnessing the power of technology. The Group is guided everyday by its purpose of unleashing human energy through technology for an inclusive and sustainable future. It is a responsible and diverse organization of 360,000 team members in more than 50 countries. With its strong 55-year heritage and deep industry expertise, Capgemini is trusted by its clients to address the entire breadth of their business needs, from strategy and design to operations, fuelled by the fast evolving and innovative world of cloud, data, AI, connectivity, software, digital engineering and platforms. The Group reported in 2022 global revenues of €22 billion.
