FS SUSTAINABILITY OVERVIEW

Sustainability is one of the top priorities of the Group. The year 2023 marked a significant milestone for us as we witnessed remarkable growth, surpassing our targets with an outstanding 180% year-on-year increase. As we set our sights on the year ahead, our focus remains steadfast on achieving our ambitious 50% year-on-year growth objective.

- We're determined to achieve this goal through two key avenues: [Read More](#)

Please familiarize yourself with our offerings and POVs and feel confident approaching your clients' on this topic as a leader in Sustainability Transformation Services.

FS SUSTAINABILITY WEBINAR

Why is Sustainability a Propel offer?

- **Because it requires** a massive amount of transformation and innovation.
- **Because as a leader in business & technology transformation**, we are well positioned to help our clients in this transformation.
- **Because it enables us** to attract & retain top talent.
- **Because it aligns with our purpose to:**
“Unleash human energy through technology for an inclusive and sustainable future”

HOW ARE WE TAKING OUR OFFERS TO CLIENTS

Our Sustainability offering Framework helps companies accelerate their sustainability transformation from commitment to sustainable achievements, across three layers:

COMMIT

Define clients' strategy and adjust their business models

ACT

Help them operationalize through sustainable design and operations.

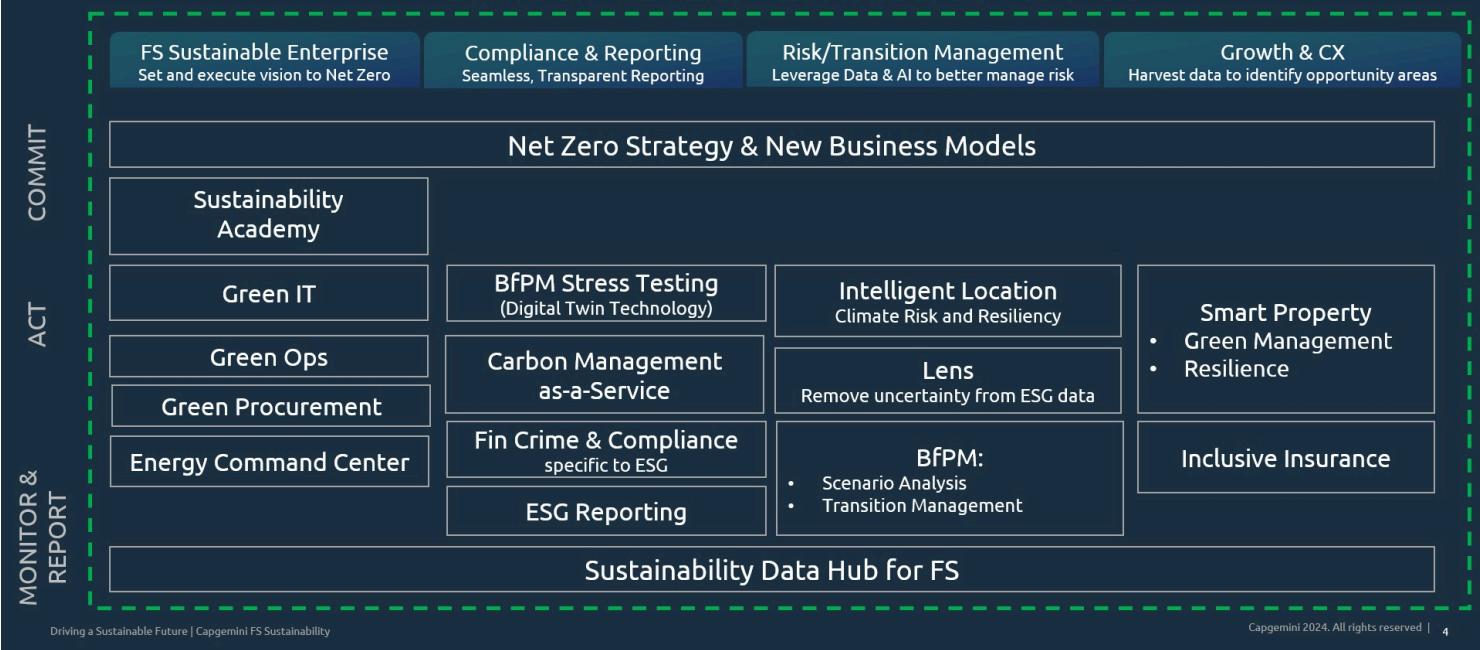

MONITOR & REPORT

Precisely model and track their evolution.

CAPGEMINI'S BREADTH AND VERTICALIZED DEPTH OF SERVICES DIFFERENTIATES US IN THE MARKET

Capgemini's Financial Services Sustainability Framework

DIRECT SUSTAINABILITY OFFERINGS

These Capgemini offerings directly offer Sustainability solutions such as establishing a net-zero strategy, selecting the appropriate actions to support the strategy, and measuring and reporting the Sustainability benefits without the use of greenwashing factors.

WALKING THE TALK

HOW INSURERS CAN LEAD
CLIMATE CHANGE RESILIENCY

In collaboration with Efma

WALKING THE TALK: HOW INSURERS CAN LEAD CLIMATE CHANGE RESILIENCY – Thought Leadership

Climate change is significantly impacting people and business. Insured natural catastrophe losses have increased by 360% within the past 30 years. Insurers need to position themselves to generate deeper customer trust and offer personalized solutions tailored to individual needs.

BANKING ON SUSTAINABILITY – Thought Leadership

As banks establish net-zero targets, they must adjust their business and financing activities to align with initiatives aimed at decarbonization. Our new whitepaper, Banking on sustainability: The future of GHG emissions reporting and sustainable lending, helps banking leaders identify the full impact of their portfolio emissions sources – direct, indirect and value chain.

FROM AMBITION INTO ACTION: HOW FINANCIAL INSTITUTIONS CAN ACCELERATE A SUSTAINABILITY AGENDA – Thought Leadership

From Ambition to Action: How Financial Institutions are Accelerating their Sustainability Agenda. An Executive Summary of the CRI report around COP27 to focus on Financial Services.

SUSTAINABLE UNDERWRITING: HOW INSURERS CAN ACCOUNT FOR ESG RISKS AND ENABLE DYNAMIC PRICING – Thought Leadership

By integrating more data from a more diverse range of sources and automating workflows, insurers can develop meaningful ESG scores for rating and pricing risk.

Everest Group Sustainability Enablement Technology Services PEAK Matrix Assessment 2022

Capgemini positioned as a leader to help clients on their sustainability goals. Key highlights:

A strong focus on data-driven sustainability solutions for a net zero strategy, life cycle assessment, and sustainability product engineering.

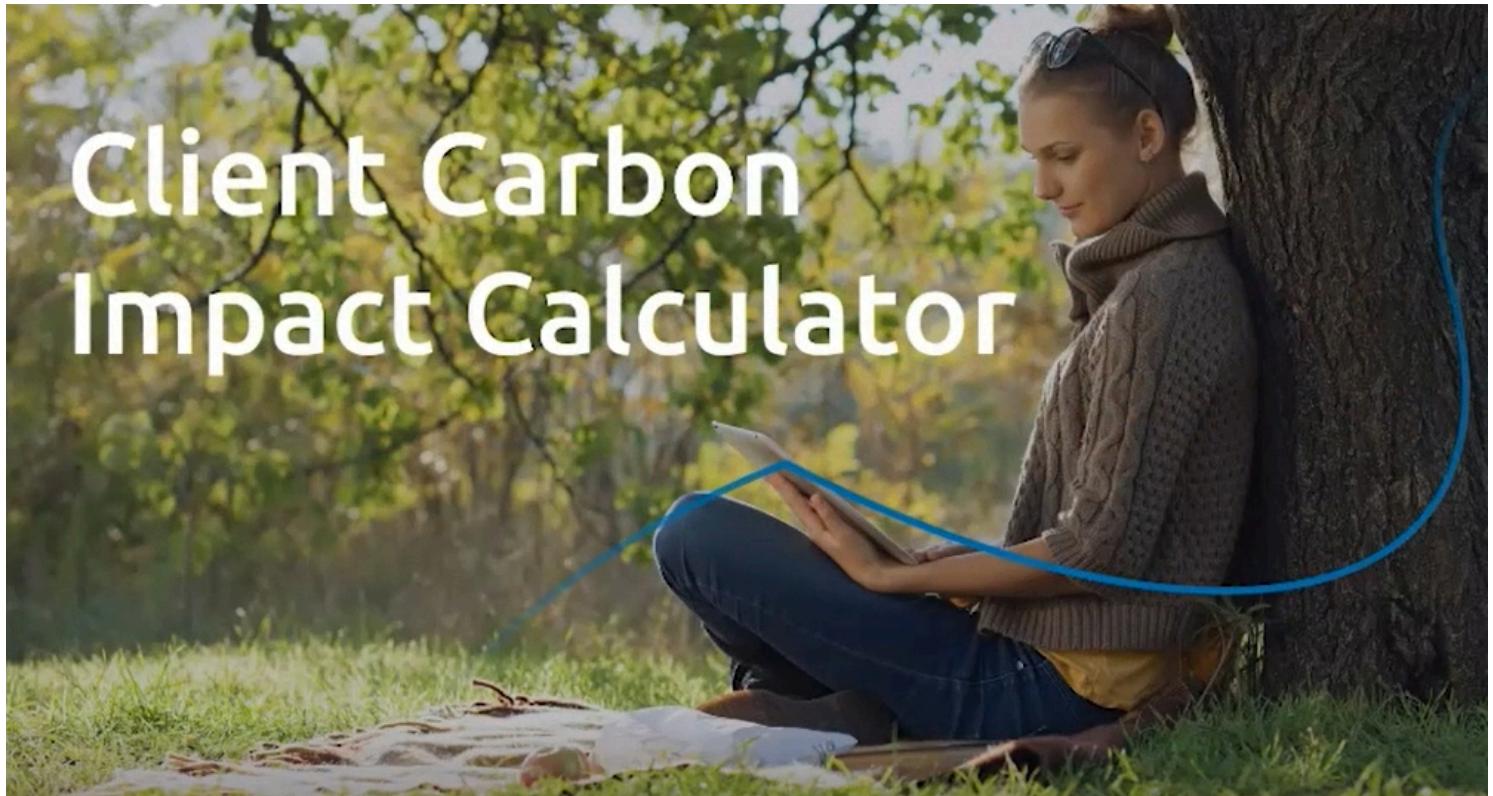

A robust set of sustainability-specific partnerships with joint go to market with select partners.

Technical capabilities and its ability to effectively deploy emerging technologies in the engagement.

CARBON CALCULATOR

The calculator provides an adaptable framework to enable the measurement of the carbon impacts across a broad range of sectors and projects. In addition, it also assesses the impacts of our project delivery teams to create an authentic estimate of the overall impact. Capgemini's global Environmental Sustainability program in conjunction with the London and Mumbai AIEs have developed and trialed the calculator over the past months in collaboration with our global sales team.
