FS Sustainability: Data for Net Zero (FS)

Sira Sissoko : 2-2 minutes : 4/1/2024

Tej Vakta Senior Director Financial Services

Financial Services Data Cloud solution enables "live data sharing" across different cloud platforms— without having to move or copy data. In addition, the solution offers unified governance and security capabilities, tailored to the financial services industry. With a cloud-based model, financial services companies can work with large amounts of data from a wide variety of sources to gain insights into ESG performance, which can ultimately help them reduce risk, attract customers, and increase revenue.

Elevator Pitch

Definition: Capgemini's solution empowers Financial Services Institutions to build a specific data ecosystem that supports measurement, reporting, and monitoring around Sustainability, while also empowering them to offer greener products and become a sustainability-focused brand. Our solution helps to build Environmental Sustainability & Governance (ESG) Data Supply Chains with ready-to-deploy ESG-Datahub platforms. This is further supported by an inventory of sustainable use cases, along with an ESG-Marketplace and Ecosystem of niche ESG data & solution providers to drive sustainability for themselves and their customers.

Why Capgemini? Capgemini has already embarked on a Sustainability journey by committing to achieve carbon neutrality by 2025 and to become Net Zero by 2030. With elaborate actions taken right across environment sustainability, diversity and inclusion practices, it is leading by example. We delivered a target of 30% reduction in carbon emissions per employee in January 2020, a decade ahead of schedule.

External Recognition: Capgemini has achieved a position on the CDP 'A List' published by global environmental non-profit CDP for its leadership in corporate sustainability, and in particular its actions to cut emissions, mitigate climate risks and develop the low-carbon economy.

Barriers: Currently there is a lack of standardization for measurements on Sustainability. The overall measurement requires an effective approach across ESG and SRI frameworks; across regulations and scoring agencies and third-party data.

Best-in-class partnerships: Arabesque, AWS, MSCI, Moody's Analytics, ACCERN, ClimateTrade, Bloomberg

Did You Know? Capgemini has a fully functional carbon-accounting group for 10+ years and committed to be NetZero by 2030.
