Mule Transformation @ Speed

Giovanna Henny∶2-2 minutes∶3/29/2024

Pradeep Rangdal Portfolio Manager

The industry is mitgrating their legacy applications to cloud natitve, API, microservice architecture. The cost and flexibility is drivng them to opensource technologies.Capgemini's Mule API migration approach to Springboot has defined blueprint in addressing the end to end large scale migration with a considerable cost reduction by automation and improved time to market.
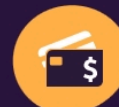

Elevator Pitch

Definition: Mule Transformation – The API migration approach has defined blueprint in addressing the large scale migration with ~60% effort reduction by automation and ~50% improved efficiency in time to market. Our assessment and migration tools brings in great degree of automation in assessment and migration of mule APIs to Springboot and also to help determine the complexity and size the mule API workload.

Barriers: The main barriers in running APIs on proprietary technologies like MuleSoft, Tibco are incurring license cost and reduced flexibility in modernization and for cloud adoption.

Did You Know? We helped HSBC Bank and LPL Finance in their journey of API transformation by early time to market with reduced efforts. More than 500+ APIs were analyzed and migrated using this solution at LPL Finance and HSBC in two separate engagements.

Did You Know? Our Mule Transformation @ Speed solution has generated us a revenue of USD $1.9M from LPL financial and $770,000 from HSBC during 2022-23

Why Capgemini?
- Capgemini has a built-in automation in transforming Mule workload with automation reducing the overall efforts by 60% enabling early go to market.
