Managing IT Sustainability with Digital SIAM

As Sustainability has moved to the top of CEO agendas, **CIOs must develop the capability to support the organizations Sustainability commitments and objectives**. Capgemini has developed a leading solution to help CIO's engage in a comprehensive Sustainability program using the ServiceNow ESG module coupled with Capgemini's industry leading Digital SIAM methods and automation platform.

The **Digital SIAM Sustainability** solution provides IT organizations with a **strong foundation and a centralized portal** for managing IT Sustainability metrics collection, Analytics reporting, and the methodical establishment of Programs and Projects to increase IT Sustainability across a complex IT ecosystem. This Sustainability foundation enables the ongoing expansion and evolution of IT Sustainability suited to each customers Sustainability journey.

Capgemini's IT Sustainability Transformation begins with two primary initiatives:

- Sustainable IT Ecosystem Integrated Management & Governance
- Sustainable IT Ecosystem Integrated Supply Chain and Provider Management

These two IT Sustainability Programs establish a flexible foundation for each CIO's Sustainability Roadmap

If you are looking to solution this for the Client contact your regional SMEs and Offer Owner listed at the bottom of the page.
